Comprehensive AI & Analytics Report

1. Executive Summary & Live Operations

Report generated on June 18, 2026. The real-time streaming infrastructure is currently tracking a live session revenue of \$821,532.00. The historical dataset highlights West as the primary revenue driver.

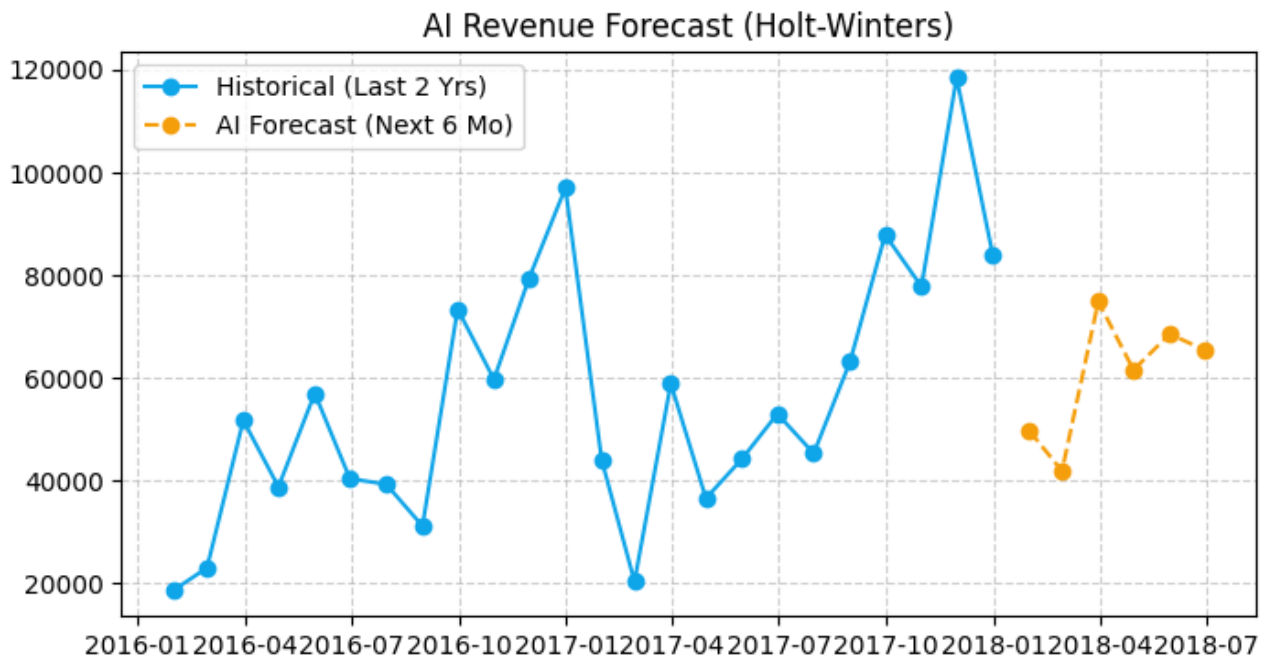

2. Visual Analytics & Market Share

Historical Sales Distribution by Region

3. AI Time-Series Forecasting

The Holt-Winters exponential smoothing model projects a revenue of \$49,693.65 for the upcoming month.

4. Random Forest Baseline Predictions

Based on our trained Random Forest Regressor, a standard future transaction (5 items, 10% discount, West region) is predicted to generate \$682.28 in revenue. The model evaluates item quantity and discount rate as the highest contributing features to variance.
